Professional Summary

Results-oriented **Associate Software Engineer** with a strong foundation in **React, Next.js, and TypeScript**. Recently completed a Software Engineering Internship at **DLAD Software Solutions**, gaining hands-on experience in building high-performance, headless e-commerce storefronts using **Shopify Hydrogen** and **Sanity CMS**. Proven ability to deliver scalable web solutions using **Java Spring Boot** and modern frontend frameworks. Committed to clean code, responsive design, and efficient problem-solving within Agile environments.

Core Competencies

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS
- **Backend:** Java (Spring Boot), Node.js, Express.js, REST APIs, Python
- **E-commerce & CMS:** Shopify Hydrogen, Sanity CMS, Headless Architecture
- **Databases:** MySQL, MongoDB
- **Tools & Methodology:** Git, Jira, Agile, Vite, Figma

Professional Experience

Software Engineering Intern | DLAD Software Solutions Pvt Ltd, May 2025 – Jan 2026

- Developed and optimized real-world headless e-commerce storefronts using **Shopify Hydrogen** and **Next.js**.
- Architected content schemas and implemented efficient data fetching using **Sanity CMS**.
- Collaborated on international projects, ensuring seamless multi-lingual metadata integration and responsive user interfaces.
- Configured development environments using **Vite** and ensured UI state consistency by deriving navigation logic directly from URL handlers.

Selected Projects

TNA Agencies (Real Estate Platform)

- Developed a full-stack application using **Java Spring Boot, React**, and **MySQL** following MVC architecture.
- Integrated a **Machine Learning** module to provide automated property price estimations.
- Implemented secure user authentication, authorization, and a comprehensive admin dashboard.

Online Food Ordering Website

- Built a multi-role system (Customer, Restaurant Owner, Admin) using **Spring Boot** and **React**.
- Integrated the **Stripe Payment Gateway** for secure, real-time online transactions.
- Designed features for order management and real-time order tracking.

TEA-DROP-HYDROGEN-3

- Developed a high-performance storefront utilizing the **Shopify Hydrogen** framework and **Tailwind CSS**.
- Focused on SEO, system optimization, and custom headless CMS integrations to enhance user experience.

Education

BSc. (Hons) in Software Engineering

Cardiff Metropolitan University (UK)

Grade: 2.1 (Second Class Upper Division)

Major: Web Development | Minor: Machine Learning

Languages

- **English:** Professional Proficiency
- **Sinhala:** Native
