PROFESSIONAL SUMMARY

Results-oriented Software Engineer with a strong foundation in modern JavaScript/TypeScript ecosystems, React, and Next.js. Proven track record of designing high-performance headless e-commerce storefronts, architecting CMS schemas, and optimizing web applications for maximum speed, SEO, and responsiveness. Hands-on experience across the entire Software Development Lifecycle (SDLC) within Agile globally distributed team setups.

CORE COMPETENCIES

Programming Languages	JavaScript (ES6+), TypeScript, Java, Python, HTML5, CSS3
Frameworks & Libraries	React.js, Next.js, Node.js, Express.js, Java Spring Boot, Tailwind CSS
E-commerce & CMS	Shopify Hydrogen, Sanity CMS, Headless Architecture
Databases & Tools	MySQL, MongoDB, Git, GitHub, Vite, Jira, Agile Methodologies, Figma
Software Engineering	API Integration, Web Performance Optimization, System Design, Component Architecture

PROFESSIONAL EXPERIENCE

DLAD Software Solutions Pvt Ltd

May 2025 – Jan 2026 | Sri Lanka

Software Engineering Intern

- Developed and optimized production-grade headless e-commerce storefronts utilizing Shopify Hydrogen and Next.js, driving measurable web performance optimization.
- Architected modular content schemas and managed data fetching with Sanity CMS, gaining deep exposure to composable architectures.
- Collaborated within an Agile team structure on international, cross-border projects ensuring multi-lingual metadata integration and responsive UI components.
- Configured development systems using Vite and engineered dynamic URL handlers to maintain strict frontend user interface state consistency.
- Participated throughout the full Software Development Lifecycle (SDLC), troubleshooting and debugging frontend systems to optimize rendering speeds.

SELECTED PROJECTS

TNA Agencies — Real Estate Platform

Full-Stack Developer

- Designed and built a full-stack web application following modern MVC architecture patterns using Java Spring Boot, React, and MySQL.
- Integrated a custom Machine Learning module backend service to deliver automated property price estimations on the client interface.
- Implemented frontend security best practices, utilizing secure user authentication, role-based authorization, and an administrative dashboard.

Online Food Ordering Website — Multi-Tenant Platform

Full-Stack Developer

- Engineered a multi-role user system (Customer, Restaurant Owner, Admin) utilizing a decoupled React frontend and a Spring Boot backend API.
- Integrated Stripe Payment Gateway securely to process real-time, encrypted online transactions.
- Developed dynamic tracking systems for order management, improving asynchronous user state updates.

TEA-DROP-HYDROGEN-3 — Composable Storefront

Frontend Developer

- Built a highly scalable, high-performance web storefront utilizing the Shopify Hydrogen framework and Tailwind CSS.
- Optimized web performance focusing on application loading speeds, SEO best practices, and customized headless CMS components.

EDUCATION

BSc. (Hons) in Software Engineering

Cardiff Metropolitan University (UK)

Grade: 2.1 (Second Class Upper Division)

Major: Web Development | **Minor:** Machine Learning

LANGUAGES

English: Professional Proficiency

Sinhala: Native
